## Press Release

### ProVision Communications exhibits HDTV over 802.11n Wi-Fi at CableLabs® Summer Conference 2009:

Bristol, England and Keystone, Colorado, August 17<sup>th</sup>, 2009 – ProVision Communication technologies Limited (“ProVision”), a technology licensing company specializing in the transmission of HDTV over 802.11n Wi-Fi, today announced the successful demonstration of its AXAR wireless HDTV home distribution system at the CableLabs® Summer Conference held in Keystone, Colorado 9-12 August 2009.

The AXAR 1000 provides optimum HD video throughput and performance Across-All-Rooms (AXAR) of the home. It utilizes standards based 802.11n Wi-Fi and H.264 AVC technology in conjunction with ProVision’s unique video and RF technology to provide high quality video transmission with extended range and multi-room reliability. The AXAR 1000 has been through extensive product testing by many of the world’s leading TV Multiple System Operators (MSOs) who have confirmed the high quality and performance of the product.

ProVision’s Co-founder and CTO, Professor Andrew Nix commented, “The particular advantage of a standards based solution is its interoperability, enabling consumers to access media at little or no extra cost on a variety of alternative platforms to the TV, such as a Laptops, PDAs or cell phones”.

Ian Walsh, VP Business Development added, “ProVision’s unique extended range technology delivers for the first time a reliable and robust wireless HDTV home distribution system making it the ideal choice for the Multiple System Operators (MSOs) worldwide”.

The AXAR 1000 technology is being licensed as a complete product or can be configured as a module for inclusion in Set Top Boxes, Home Gateways and HDTVs.

#### About ProVision

ProVision is a leading supplier and centre of excellence for the design, development and licensing of high performance consumer HDTV wireless multi-room distribution technologies. The technology enables the consumer to access HDTV content from different sources such as Cable, Satellite, IPTV and Blu-Ray Players in any room in the house and view it on a TV, PC, laptop or Cell Phone.
